

John Deere Model "D" Tractor

for the Heavier Farm Jobs

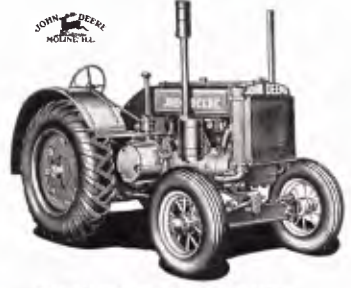

THE "DADDY" of all John Deere Tractors—that's the Model "D". Always an outstanding value since it was placed on the market 14 years ago, the present Model "D" is a greater value than ever.

Here is *power*—power to handle four bottoms in many soils, three bottoms under practically any condition . . . surplus power to get you over the peaks . . . smooth performance on belt and drawbar.

Here is *economy*—ability to burn the low-cost fuels . . . *simplicity* that cuts down repairs and maintenance costs . . . *dependability* that means the Model "D" is always ready to go—low-cost power that saves time, labor, and effort and makes more money.

Here are such features as exclusive two-cylinder construction, straight-line transmission, natural-draft carburetion, crank-case ventilation, responsive governor, belt pulley on crankshaft, force-feed pressure engine lubrication, oil-wash air cleaner, automotive steering, comfortable seat, full skirted fenders, easily adjusted drawbar. Here is a tractor to handle the heavier farm jobs easier, faster, more economically.

Model "D" with rubber tires.
